CDWdrives sells and supports Andco Actuators

GE's Andco electric linear and rotary actuators offer a superior technology choice when reliable, precise, controlled motion is required. Whether moving industrial doors, providing accurate positioning feedback for antennas, or modulating and controlling louver dampers, customers can rely on Andco actuator solutions.

The Andco actuator portfolio includes weatherproof and dustproof options, offering customers durability and performance in severe industrial environments, including hot and cold temperature extremes. Andco actuators are a superior solution for a range of functions including positioning, lifting/lowering, pushing/pulling, and opening/closing.

Andco actuator technology offers low maintenance packages with internal adjustable limit switches for on/off control and light indication, internal torque switch for overload protection, optional internal position/process controls for positioning, motor braking and motor control. Our actuator solutions deliver ease of installation, maintain constant output force and velocity, and consume power only during movement.
