### Material Handling Equipment Experts

CDWdrives serves a vast market of industries that require material handling expertise. Port facilities, aggregate, cement, material processing, grain, steel, power plants and other industries have turned to CDWdrives for solutions to their materials handling problems. CDWdrives has a full range of capabilities including conceptual system analysis and design, equipment design, manufacture and installation.

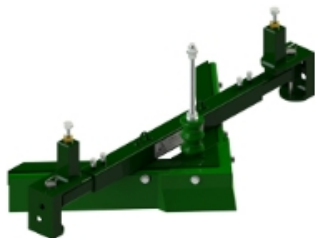

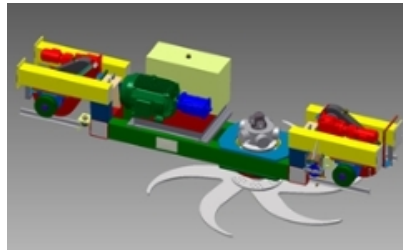

### Our Commitment

Today CDWdrives operates with the same sound philosophy and dependable people that created its proud history. We are charting our course for an exciting and challenging future, fully committed and responsive to our markets and customer's needs. We will meet these needs with ingenuity in product design and application with a dedication to service unequalled in our industry. We are dedicated materials handling specialists.

### The Right Stuff

CDWdrives capabilities are reflected in the design assistance and development of equipment such as feeders, trippers, breakers, rotary plows, idlers and pulleys. Working closely with its customers, CDWdrives offers the equipment and services to reduce costs and manpower requirements, increase production and make better use of available space.

### Systems Integration

A material handling system, simple or complex will perform only as well as its component parts, the engineering that went into its design and its installation. CDWdrives has earned the respect and confidence of those it has served
