CDWdrives AquaBearing It won't rust

If you need a durable bearing that can run up to 200 RPM dry and up to 5,000 RPM lubricated, the CDWdrives AquaBearing™ is the answer. The CDWdrives AquaBearing™ insert will not rust. In addition, you will never need to lubricate the CDWdrives AquaBearing™ because it relies on water for self-lubrication. This product is virtually maintenance free.

Corrosion resistant? *You bet.*
Edge loading? *No problem*
Extreme temperature tolerances needed? *Bring it on.*
Seizing problems? *Problems solved.*
High abrasion potential? *You are covered.*
Need quiet? *You got it.*
