BUY FROM THE BEST WITH PRODUCTS YOU GET EXPERTS

Carlson - Dimond & Wright, Inc. was founded in 1956 as a consulting engineering firm for the automotive industry. Once in business we quickly became the pre-eminent power transmission distributor in eastern Michigan. We then focused on engineering, manufacturing and supporting products for industry.

We have said in the past that "We are not a catalog, we're engineers." That is a powerful tag line that tells our story. What does it mean? The message is simple. When you do business with Carlson - Dimond & Wright, Inc. you are dealing with degreed engineers and experienced mechanics who know what they are talking about. We understand the problems you are trying to solve with your purchase and will recommend the best solutions and then stand behind our recommendations.

Better yet, we invite you to call CDW Drives for an application consultation before making your purchase. Pre-sale application consultation is an added service that our customers value greatly. If you are like most of our clients, you need to make the right purchasing decision quickly and receive your order in a timely manner. Check, check.
