### Disc Pack Couplings

*With Keyway Mounting or Conical Clamping Ring Mounting*

From 3,100 to 177,000 lb.-in. torque

**Model LP1 Keyway Mounting**

Very high torsion stiffness  
Single flex design  
Compact layout  
Compensates for axial and angular misalignment

**Model LP2 Keyway Mounting**

High torsional stiffness  
Double flex design  
Customer specified length  
Compensates for axial, angular and lateral misalignment

**Model LPA for *API 610* Pump Systems**

Customizable for individual project requirements  
Intermediate tube removal without disturbing adjacent equipment  
Integral safety catch in case of disc pack rupture

**Model LP3 Conical Clamping Ring**

High torsional stiffness  
High clamping pressure  
Backlash free torque transmission  
Good for high speed, reversing or intermittent loading
