**Solid Bushing... Solid Roller... SOLID POWER**

Since being founded in 1916, HKK Chain has concentrated its efforts on the manufacturing of roller chain. Their drive is simple: Manufacture the world's highest quality roller chain while providing an excellent value to their customers.

**WHY BUY HKK ROLLER CHAIN FROM CARLSON-DIMOND & WRIGHT? WE DELIVER SUPERIOR QUALITY ROLLER CHAIN AT A COMPETITIVE PRICE SUPPORTED BY OUR KNOWLEDGEABLE STAFF AND RELIABLE SERVICE. IT ALL ADDS UP TO VALUE.**

HKK Chain is continually striving to make new breakthroughs in roller chain design. Combining quality, convenience, reliability, and cost with new technology, improved materials, and an expanded application base, HKK is ready to provide the highest quality chain worldwide well into the next century. Here are a few features, which we invite you to compare, point by point, with other power transmission methods.

**Drive Efficiency**

The drive efficiency rating of HKK roller chain is over 98%. As positive as gears and as flexible as belts, HKK roller chain provides an ideal transmission of power with exact speed ratio. Throughout the entire working life, there is no power loss through friction or slippage.

**Economy**

HKK roller chains offer maximum operating advantages at minimum cost. They are also easily removed and maintained. These qualities, combined with precision manufacturing, provide trouble-free service. HKK roller chains are manufactured from the highest quality steel. Chains should be recycled after use, helping to clean our environment and protect our natural resources.

**Durability**

HKK roller chains are comparatively light in weight, yet they embody great strength. The elasticity of HKK chains absorbs shock and vibration, thereby protecting other machine components.

**Flexibility**

HKK roller chains are well suited to a broad range of operating conditions, short or long shaft center distances: multiple shafts drives; slow or fast speeds; light or heavy loads; frequent starts and stops. HKK chains can be expanded, shortened, or customized using various attachments with relative ease. They are also highly resistant to adverse environmental conditions caused by temperature, dust, moisture, etc.
